

Reduce Costs & Ensure Compliance with In-Country Storage from EverFiles

Secure, in-country cloud storage that offers regulatory compliance and powerful file sharing features at reduced costs.

Key Features:

- Secure Private Cloud File Server:** Store, share and access your business data securely from anywhere, with robust encryption.
- In-Country Data Storage:** Meet data access and privacy requirements and keep your data within local borders for regulatory compliance.
- Advanced User Permissions:** Control access to data and ensure security with granular permissions.
- File Versioning and Recovery:** Restore previous versions of files in case of accidental deletion.
- Real-time, Secure Mobile Access:** Access and share files from any device, anytime.

Built with SMBs in mind, to:

- Reduce Costs:** Our competitive pricing plans could translate to significant savings for you.
- Unlock Powerful Document Management Features:** Move beyond basic file sync & share for increased productivity and improved teamwork.
- Simplify IT Management:** Consolidate your file storage and streamline data access for your employees.
- Ensure Data Security and Compliance:** Protect your sensitive data with robust encryption and in-country storage that adheres to local regulations.

Why Choose EverFiles from IronTree?

- Secure and Compliant:** Our solution prioritises data security and meets the specific regulatory requirements faced by local businesses.
- Easy Migration Process:** Migrate your files seamlessly from alternative providers without disrupting your operations.
- Cost-Effective Alternative:** Enjoy significant cost savings compared to other provider subscriptions.
- Enhanced Functionality:** Gain access to advanced file management and access control features beyond what other providers offer.
