

Your people are your biggest security risk. Let's fix that.

Most cyberattacks don't break through firewalls – they walk through the front door because someone clicked the wrong link. Security Awareness Training (SAT) turns your team from your weakest link into your strongest defence.

3rd

Africa is the 3rd most targeted continent for cybercrime

53%

of SMBs don't understand ransomware risks

Only 10%

are confident staff would report a phishing email

THE PROBLEM

Sound familiar?

You've got antivirus, maybe a firewall – but when last did anyone actually train your staff? If you're not sure, you're not alone.

A single phishing click can hand criminals access to your whole system – and your staff probably don't know how to spot one.

POPIA, the Joint Standard, and King V require evidence of staff security training. A formal programme makes proving it the easiest part of your next audit.

41% of SMBs have no way of measuring whether their training is working – or if they even have any.

A breach doesn't just cost you money – it costs you trust. For an SMB, that can be existential.

HOW IT WORKS

Short lessons. Real habits. Ongoing protection.

Powered by the Wizer platform, our SAT delivers bite-sized training and realistic phishing simulations – not a once-off slide deck that everyone forgets by Friday.

- **Monthly training** – Short video lessons and quizzes that fit into a normal workday. No all day workshops, no death by PowerPoint.
- **Real phishing simulations** – We send your team fake phishing emails to see who takes the bait, then teach them exactly what to look for next time.
- **Clear reporting** – See who's completed training, who clicked what, and how your team is improving over time.
- **Compliance-ready documentation** – Certificates and audit evidence so you're covered when a regulator or insurer comes knocking.

TWO WAYS TO GET STARTED

Same platform. Same training library. Same dashboard.

The difference is how much of the heavy lifting we do for you.

SELF-MANAGED

SAT Essentials

You're in the driver's seat. We set you up, show you the ropes, and you run the programme your way.

Best for: Self-sufficient teams of 5–50 people who have some internal IT or HR capacity and want to keep costs lean.

- ✓ **We handle setup** – platform configured, your users imported, ready to go.
- ✓ **Full training library** – pick and schedule campaigns from our content catalogue.
- ✓ **Phishing simulations** – run them yourself whenever you need to test the team.
- ✓ **Dashboard & reporting** – full visibility into who's trained and how they're doing.
- ✓ **Compliance docs** – generate your own certificates and evidence as needed.
- ✓ **Email support** – we're here if something breaks.
- ✓ **White-label branding** available as an add-on.

FULLY MANAGED

SAT Complete

We run the whole programme for you. You focus on your business – we make sure your team stays sharp.

Best for: Regulated industries or teams of 10+ who don't have the internal capacity (or appetite) to manage a security programme themselves.

- ✓ **Full setup & configuration** – we handle everything from day one, including ongoing user management.
- ✓ **Monthly campaigns, designed for you** – we build and run your training programme every month.
- ✓ **Monthly phishing simulations** – we create and launch them; you see the results.
- ✓ **Monthly executive reports + quarterly reviews** – clear insights without the spreadsheet-diving.
- ✓ **Compliance support** – certificates, audit evidence, and documentation handled for you.
- ✓ **Dedicated Account Manager** – one person who knows your business and your programme.
- ✓ **4-hour support SLA** + white-label branding included.

Ready to protect your people?

Both plans are **month-to-month and per-user** – so you only pay for what you need. Talk to us about which option fits your team.
